FEATURES OF THE CELEBRATED *Arab*

Heavily ribbed and rigid type bed.

Front and back platens accurately machined and scraped, giving perfect make-ready surface.

Handy and serviceable ink duct. Accessible—easy to regulate and quickly cleaned.

Inking rollers cover full forme.

Easily operated impression. Accurate and positive screw adjustment by operator.

Readily adjusted friskets can be laid on at any position.

Accurately machine cut gears; motion free from vibration. Efficient brake.

Long 'dwell' during impression reduces wear on type and machine. Additional 'dwell' makes feeding a simple operation.

Motors for Drive:

$\frac{1}{2}$ h.p. for F.cap folio and Cr. folio. 1 h.p. for Demy folio.

Recommended machine speed 125 r.p.m. giving output of 1,500 Impressions per hour for F'cap. Folio and Cr. Folio, and 1250 for Demy Folio.

Floor Space: Cr. Folio and F'cap Folio, 4' 0" x 4' 0".

Demy Folio, 5' 0" x 5' 0".

C. F. 12cwt. 0qr. 18lb.

D. F. 18cwt. 1qr. 20lb.

Packed for Export:

14cwt. 2qr. 14lb.

16cwt. 2qr. 0lb.

23cwt. 1qr. 20lb.

FULLY ERECTED MACHINES

Sizes of Cases:

Demy Folio 5' 3" x 4' 8" x 5' 7"

Crown and Foolscap Folio 4' 4" x 3' 9" x 4' 9"

BUILT TO LAST

SIMPLE · ACCESSIBLE · TROUBLE FREE

WE HEAR FROM SATISFIED USERS —

The "Arab" is beautifully made and runs like a watch, the inking is excellent and the impression as firm as a rock, in fact for ordinary letterpress jobbing it would be hard to equal, and we arrived at the decision to purchase your machine after carefully examining most other makes.

We may say that we have had this "Arab" for almost forty years and it is still going strong at 1,500 per hour.

Our "Arab" has been running steadily for 51 years, has cost us under £5 for overhaul etc., during the whole of the period referred to, and is still doing excellent work and running as sweetly as when new.

In over a hundred and fifty years' experience of printing, your "Arab" has stood the test best of all.

The "Arab" which has been in use in our works at Kuala Lumpur for the last four years, has given entire satisfaction.

This is the first set of renewals, after over thirty years of good hard work, wish we could say the same of some of our other machines.

The engineers who have seen our "Arab" all comment on the sturdy and heavy construction and say that after 54 years of work the machine is still capable for another 50 years.

A popular machine with most of the Steamship Companies.

**THE PRINTER OF THIS LEAFLET HAS USED ARABS FOR 60
YEARS - THIS IS PRINTED ON ONE OF THEM.**
